

Rope, polypropylene, black, 8mm twisted

Aperçu

Specifications		
Item code	410000072	
Unit weight	N/A	

Ropes can be made from various types of material, properties of some of the most common materials are summarised below. This page provides specifications only for the polypropylene ropes, although these may not be the best choice in every situation as described below.

	Natural fibre	Polypropylene	Nylon/polyester
Strength	-	+	++
UV Resistance	+++	-	+
Elasticity	+	++	++++
Wear Resistance	+	+	++
Resistance to rot	-	++++	++++
Cost	Cheap	Average	Expensive

Below is the specification of rope used with plastic sheeting, as part of IOM prepositioned kits.

Choose the material according to the use:

• Polypropylene is commonly available and of average cost, it serves general purposes. Very sensitive to UV. Dark colour ropes, in particular black, resist UV far more than light colour ropes.

Standard minimum breaking strength, and in brackets the limit of use:

• Polypropylene: 6mm/590kg (200kg) - 8mm/1040 kg (350kg) - 14mm/2990kg (1000kg)

Black ropes are recommended for outdoors long-term use, for their resistance to UV. Large quantities are normally purchased per weight instead of length. Nevertheless, a minimum length should also be indicated in the contract.

La description

Rope - Polypropylene - Twisted 8mm diameter

Diameter	8mm +/- 0.5mm
Length	15m +/-0.150mm
Weight	n/a
Number of strands	3 minimum

Rope - Polypropylene - Twisted omm diameter		
Туре	Twisted	
Material	Polypropylene, no recycled fibres, UV stabilized	
Colour	Black	
Tensile strength	350 kg (1,040kg breaking strength)	
Marking	With a permanent label, showing: Type of rope, material, manufacturer, length, tensile strength, standard of reference, inspection certificate reference.	
Standard	Specifications should conform to ISO9554	
Packing Detail	Items to be packed in bales of 30 units of 15m each. Bales to be strapped with two straps on each side. Each unit of 15m rope to be coiled and secured using ties using a paper tape sufficient enough to handle multiple handlings, and are not individually wrapped to avoid the use of unnecessary single-use plastics.	

Rope - Polypropylene - Twisted 8mm diameter
